SECTION 5: Firefighting Measures

	5 0	
5.1	Extinguishing Media	
	Suitable extinguishing media:	Special powder for metal fires. Do not use
		water.
	For safety reasons unsuitable extinguishing agents:	Water
5.2	Special Hazards Arising from the Substance or Mixture	
	If this product is involved in a fire, the following can be released:	Metal oxide, carbon monoxide and carbon
		dioxide
5.3	Advice for Firefighters	
	Protective equipment:	Wear self-contained breathing apparatus.
		Wear full protective suit.
	Hazardous combustion products/special hazards:	Fine, dry dust suspensions can explode in
		presence of ignition. Combustion produces
		carbon monoxide, carbon dioxide, smoke,
		soot and minor amount of nitrogen oxides
		and sulphur.

	SECTION 6: Accidental Release Measures
6.1	Personal Precautions, Protective Equipment and Emergency Procedures
	Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation. Keep away from
	ignition sources. Refer to section 8 for personal protection. Do not create dust.
6.2	Environmental Precautions
	Do not allow material to be released to the environment without proper government permits. Do not allow
	product to reach sewage system or water bodies. Do not allow to enter the ground/soil.
6.3	Methods and Material for Containment and Cleaning Up
	Keep away from ignition sources. Ensure adequate ventilation. Vacuum or sweep and transfer to a sealable,
	labelled container and dispose according to local regulations.

6.4 <u>Reference to Other Sections</u> See section 7 for information on safe handling See section 8 for information on personal protection equipment See section 13 for information on disposal.

SECTION 7: Handling and Storage

7.1 <u>Precautions for Safe Handling</u> Keep containers tightly sealed. Store in a cool, dry place in tightly closed containers. Ensure good

ventilation/exhaustion at the workplace. Avoid formation of dust. Minimise release of the mixture into the environment.

Information about protection against explosions and fires: Protect against electrostatic charges.

7.2 Conditions for Safe Storage, Including any Incompatibilities

Store in a cool, well-ventilated location. Do not store above 120 °F/48 °C. Keep away from oxidising agents. Keep container tightly closed until in use.

7.3 <u>Specific End Use(s)</u>

The intended used of the product is for the visualisation of latent fingermarks only. The powder should be picked up using a magnetic brush, ensuring excess powder is tapped back into the jar. The formed brush head should be wiped gently across the surface of the mark to allow for visualisation. Waste powder should be transferred to a sealable container. See section 13 for information regarding disposal.

7.4 <u>Reference to Other Sections:</u>

See section 13 for information on disposal.

	SECTION 8: Exposure Controls/Personal Protection			
8.1	Control Parameters	Not required.		
8.2	Exposure Controls			
	Personal Protective Equipment			
		The usual precautionary measures should be adhered to in handling chemicals. Keep away from foodstuffs, beverages and food. Instantly remove any impregnated garments. Wash hands during breaks and at the end of work. Avoid contact with eyes and skin. Handle in accordance with good industrial hygiene and safety practice by using adequate ventilation and personal protection as needed. Maintain an ergonomically appropriate working condition.		
	Breathing equipment:	Not required in unconfined or well-ventilated areas. Use NIOSH or EU EN149 standard approved respirators for areas where general ventilation is not possible.		
	Protection of hands:	Check protective gloves prior to each use for their proper condition. The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.		
	Material of gloves:	Impervious gloves		
	Penetration time of glove material:	Not determined.		
	Eye protection:	Safety glasses or splash goggles are advised to be worn while handling.
